

Running Python:

Now you have installed Python. That means you will be able to run Python files and use the IDLE Python editor on your computer. If you want to test this quickly, you can do the following:

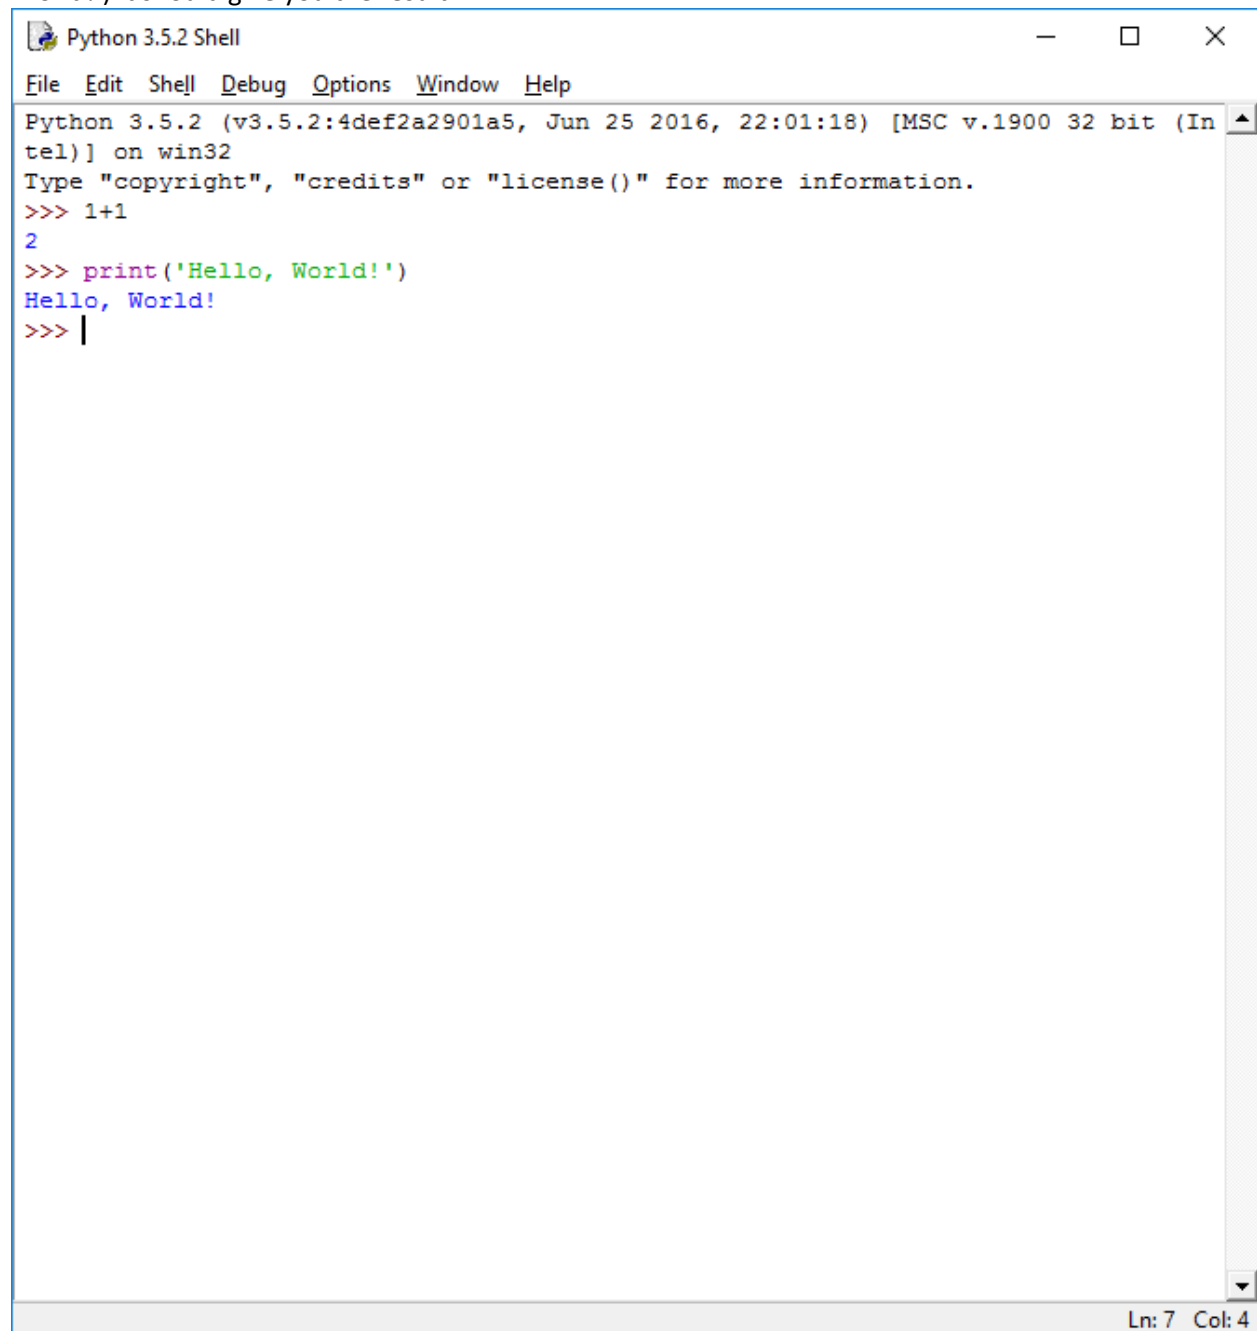

- A) Go to the text box at the lower left of your Windows desktop and type in "IDLE". You should see a program come up from the search that says "IDLE (Python 3.9 64-bit) Desktop app" show up. Click on this.
- B) You should now have the "IDLE" Python shell, that looks like this:

C) Try typing in a short python command, like:

a. a math operation: 1+1

b. a print statement: print('Hello, World!') It should give you the result:

The image shows a screenshot of a Python 3.5.2 Shell window. The window has a title bar that says "Python 3.5.2 Shell" and standard window controls (minimize, maximize, close). Below the title bar is a menu bar with options: File, Edit, Shell, Debug, Options, Window, and Help. The main area of the window contains the following text:

```
Python 3.5.2 (v3.5.2:4def2a2901a5, Jun 25 2016, 22:01:18) [MSC v.1900 32 bit (Intel)] on win32
Type "copyright", "credits" or "license()" for more information.
>>> 1+1
2
>>> print('Hello, World!')
Hello, World!
>>> |
```

At the bottom right of the window, there is a status bar that says "Ln: 7 Col: 4".
